The graph displays the daily count of COVID-19 cases in the United States from January 1, 2020, to July 1, 2020. The x-axis represents time, with major ticks for January, April, and July. The y-axis represents the number of cases, with a grid line at 100,000. The data shows a significant increase in cases starting in late February, peaking in early April at approximately 150,000 cases. Following this peak, the number of cases fluctuates, with a second major surge occurring in late May/early June, reaching another peak of about 150,000 cases. The graph is divided into two sections by two vertical dashed red lines, likely representing the first and second waves of the pandemic.
