The graph displays the Mean Fold Index (MFI) over time for two conditions: 'After' (black line) and 'Before' (pink line). The x-axis represents time from January 2022 to January 2023, with major ticks every three months. The y-axis represents MFI, ranging from 0 to over 200. Vertical dashed red lines are positioned at approximately February 15, March 15, April 15, May 15, July 15, September 15, and November 15, 2022. The 'After' series shows a sharp peak in late April 2022, reaching an MFI of approximately 280. The 'Before' series shows a peak in early May 2022, reaching an MFI of approximately 210. Both series show low MFI values for the remainder of the period.

The graph displays the Mean Frequency Index (MFI) for two timepoints: 'After' (black line) and 'Before' (pink line). The y-axis represents MFI, ranging from 0 to 250. The x-axis represents time, from January 2022 to January 2023. Both series show a significant peak in early 2022, with the 'After' peak reaching approximately 240 and the 'Before' peak reaching approximately 220. Subsequent peaks for both series are much lower, generally below 50. Vertical dashed red lines are present at various intervals, likely marking specific events or time points of interest.
